NORMAL-DISTRIBUTION
a1

https://0x8.ch/HackersCardgame19

Inventor: Carl Friedrich Gauss Year: ~1801

E.g. the distribution of intelligence in society is normal-distributed. If you would find out that people that run amok or suicide quite often after they have been "therapied" by mental institutions and then they are shut away maybe in the same mental institution after they run amok more than the normal-distribution would predict, then you maybe sould really ask some questions. Personal Traits (eg. Mayer-Briggs) are noraml-distributed too. So these formulas are quite useful to find out if one tells the truth or not. But it is not evidence, but maybe something one should investigate.

Access Based Enumeration
a5

https://0x8.ch/HackersCardgame19

Inventor: ??? **Year: ???**

Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. The same principle maybe applies to websites, youtube, maybe even gitub... if you look at the m50 card the same system "could" be used to split society into two+ separate groups, and there would be even some triggers known to some of the older groups to start a civil war between this two groups. Maybe to explain **Access Based Ennumeration++** to the society would deescalate this problem a bit.So update your people with this knowledge. I learned about Access Based Ennumeration at ABB Technikerschule Baden, hopefully the teach this function not for the dark-side... if done in the graphics card or graphics driver one could manipulate things even if he checked if the file was transmitted correctly, so one need not to print all evidence.

Access Based Enumeration Part 2
a18

https://0x8.ch/HackersCardgame19

Inventor: ??? **Year: ~???**

Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. If you would implement that on a client computer, you could do much more dirthy tricks. For example if a Pedophila Victim, a Torture Victim or a Victim that was Subject to illegal Human Experiments would find out who did that all to him they would maybe want to keep the victim silent. So they would upload for example pedophila images on the computer of the victim, call him a Terrorist for getting access to his computers, and would find the pedophilia content. If the Victim would look at the same Folder on his Computer, the Access Based Ennumeration algorithm would hide this images, so he would not know and the jury (m37 card) would judge the Victim of Pedophilia when he was 10 years old, the would help to hide the illegal human experiments ...

Efficiency Detection
a22

https://0x8.ch/HackersCardgame19

Inventor: ??? **Year: ????**

When i work with my computer there seems to be an algorithm that detects when my work is efficient and then stops me with dirthy tricks...

The problems are not always in the same order, but efficiency seems to be an eventtrigger that starts such things smoke1, m98, m99, acid in my face eitc...

F=T∇Sᴛ
Equation for intelligence
a21

https://0x8.ch/HackersCardgame19

Inventor: Alex Wissner Gross Year: ~????

In my opinion hierarchical systems are bad (a13) so there would be alternatives, for example the equation you see in the title. For example this algorithm would provide that no sheep gets lost (m68) if one would implement it in society, social systems, facebook, twitter...
I studied Computer Science some years but for me it is to complicated to implement it.

alex_wissner_gross_a_new_equation_for_intelligence
Really great work, but maybe you sould work on your Entertaining Skills and see a fashion consultant, but i've only seen this one video, maybe i'm wrong.

Procastrinate when 80% solved
a16

https://0x8.ch/HackersCardgame19

Inventor: xxxx **Year: ~????**

Algorithm on my "computer" when i try to do things, to fix things, to finish relevant business. There are problems like extending pam-usb with udisk2 where unknown starts an algorithm, that pervents me from solving the problem. The algorithm starts tons of new problems that are also relevant, I try to solve them all but always when i solved 80% of a tasks, the next problem opens or even starts a a suicide death bot (a16) against me, Prevents that problems are finally beeing solved. There are some sort of "resonators" (Ingress), that prevent the whitehat hacker / whistleblower from solving it. Resonators maybe just other people that are beeing activated. If these are real people they are maybe beeing activated with BigData from the NSA / CIA Data Retention System that would prove earlier sins of this human(?) "BOTs". Mathematically spoken possibly / partitially transitive. t1... transmuts now "this is non-solvable problem, hahaha" (= psychological warfare)

EZAK IMAK
Hun in the Sun
a14

https://0x8.ch/HackersCardgame19

Inventor: Satan **Year: ~1950**

Ezak Imak (Kami Kaze in reverse) VS Hun in the Sun The Japanese Attacked the US Airforce most from bottom up 95% but sometimes from the top to bottom 5%, so the US Airforce had to watch both sides. Today mental institutions use the same algotithm for psychological warfare. 95% Patients are Victims, 5% are forced to run amok https://www.springer.com/us/book/9783764353384

Same Algorithm can also be used in Psychology, Politics .... for example 95% Slaves in Companies and 5% small hitters

PATTERN RECOGNITION
a9
