HYSTERESIS REMANENCE — a2

https://0x8.ch/HackersCardgame19

Inventor: James Alfred Weing **Year:** ~1890

Describes the persistence of an effect after the causing force stopped. For example in (electro-)magnetism.

Old electron tupe televisions tend to become magnetized after a while which resulted in a bad picture, so they have had to be "degaussed".

The same principle maybe also works for psychological effects, see m15, t10, m19, co1, m9, t11 or Clark Hull's Formula for Emotions.

Black use Cases

For example to burn bad behavioral patterns into a Hacker to sue him and waste his time. Time that he could better use to defend jounger people from beeing owned by the CIA

Suicide Death BOT — a16

After an interrupted Suicide Death bot they can make you say everything or maybe you tweet everything

https://0x8.ch/HackersCardgame19

Inventor: xxxx **Year:** ~????

If a person can be controlled or at least influenced by some technology cards t° evil people unfortunately could create some sort of a suicide death bot, using things like m38 card for priming to make innocent people to comit suicide (attempts). We think that this is the major way eg. CIA kills people that know to much and the reason news are normally not telling the story from people that commited suicide (maybe they killed Ian Murdock with a suicide death bot). People with lower rank would be told that it's just training or BDSM. But in fact if the Whistleblower would die the whole group would be lost too and so controllable by eg. the CIA, wirst case m37 && dt1 card. Those groups that already have "trained" a kid to death would never confess. Forced to keep silent. Possibly the code of such suicide death bots would be packed into proprietary non-deterministic crypto both personalized or generic. eg. m38 would be generic. Was Ian Murdoch@Debian also a victim?

PSYCHOLOGICAL-PROFILE FROM EYE-MOVEMENT — a19

https://0x8.ch/HackersCardgame19

Inventor: xxxxx **Year:** ~????

If you have something like google glasses, a retina-CCD Chip one could easy enumerate and footprint the psyche / the soul of the victim. if you would have at least 2 RFID chips on your head, or easier two LC-Cirquits on your head and a 3D model of the room, one could create such a profile.

I make this card neutral, because it could be used for good and also for bad.

Worst case they use such things to create at1 cards...

---

public class Object — a10

```
public    class person
protected class fahrzeug
private   class object
```
Berechtigung

object ist die Schablone mit welcher alle anderen Schablonen hergestellt werden, bzw. sagt man "von der alle anderen **Klassen (Schablonen)** erben"

Schlüsselwort dass jetzt eine eine Vorlage für eine **Klasse (Schablone)** kommt

https://0x8.ch/HackersCardgame19

Inventor: Alan Kay **Year:** ~1993

Tell the computer to define an object, which is a element (a12) where the possible values are defined and and stored it in Memory (see also **struct** / C++) but there are also "functions" that are called "methods". A class/members/methods can be public, protected and private. There are static members/methods

---

Observer Pattern — a8

https://0x8.ch/HackersCardgame19

Inventor: Erich Gamma, Richard Helm ... **Year:** ~1994

The observer pattern (also called listener pattern) is a design pattern in software development. It belongs to the category of behavior patterns. In the programming language Java it would need an interface (public interface Observer) and it would be used with "implements Observer" (needs exercise and maybe qfire, quantuminserts, Turbine, Tarmoil tries to make it hard for you to learn) It does not mean "survaillance" its a computer science Term, but of course such a design pattern can also be abused for surveillance, and eg trigger a16 Card.

To use Design Patterns you first need to learn an OOP Programming Language

---

(inverse) cinematics — a23

https://0x8.ch/HackersCardgame19

Inventor: ???? **Year:** ????

If something like Medulla Oblangata or Medulla Spinalis implant (Spinal Cord implant) would exist, they would need some sort of Matrice Operations (Jacobi Matrices?) to calculate the Body Movement. In my particular case i guess there is a malware, that is activated when they use m99 to target me. They seem to change the sign of one axis or making me steering me into singularities after about 15 minutes after i started to do body care to make me hurt "myself". So maybe it's just one of those additional Networks that is 99.9% of the time silent, that overpowers the signal i should receive with a value that has an additional minus sign for that specific axsis. But not yet sure about that.

Cognitive Dissonance Detection and passing — a24

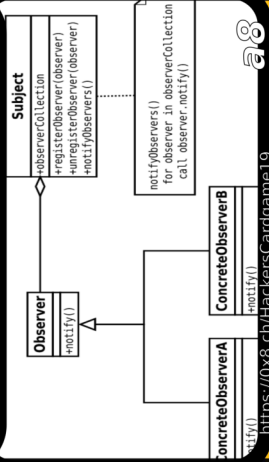

https://0x8.ch/HackersCardgame19

Inventor: xxxx **Year:** ~????

If a NSA/CIA would have access to all peoples data, even the private diaries they would maybe install some AI that analyzes what the whitehat hacker just says, writes or thinks

Then they would try to match that on persons in his / her network that would get a cogntivie dissonance because of that sentence or concept knowledge even when i dont write names in my diary CIA would possibly know what person or eg. Meyer-Briggs archetypes would rage because of what i just written into my privat diary. So it would be possible that the CIA/NSA would intentianally send this private diary entries to people to "motivate" them to attack me.

OOP CLASS — a6

https://0x8.ch/HackersCardgame19

Inventor: Alan Kay **Year:** ~1993

The inventor of the programming language Smalltalk was the first who used objects in software development. It was maybe the first Programming Language that used "**Object Oriented Programming**". Like Gutenberg could print complete books with letters templates one can create biger things out of such objects. A Class is can be single part of a complete software product. Eg. in an addressbook Class you would have predefined fileds for Name, Address, Phone Number...." You can also have such templates in Psychology, Mechanic. Simplification / standardisation through predefined templates makes things more efficient but people maybe **loose base skills when using JUST templates**
